

# HERE'S WHAT YOU'RE IN FOR WHEN YOU SCHEDULE MARK KISTLER'S ASSEMBLIES!

- Two enchanting, live performances with Mark Kistler. One assembly for grades K-2, and another for grades 3-6. FRESH NEW LESSONS EACH YEAR!
- Students arrive at the assembly equipped with paper, pencil and a book to use as a lap desk.
- Mark Kistler has the group (up to 5,000 at a time!) sit on the floor poised and ready for drawing action.
- Students complete four 3-D drawing lessons, and are challenged to write and illustrate their very own children's book!
- Using an overhead projector, television/VCR/DVD, chalkboard, and microphone, Mark Kistler guides your children through an extraordinary imagination adventure. Your students learn how to draw in 3-D while Mark tells stories of great galactic adventures, journeys to the bottom of the sea, time-travel odysseys back to the land of the dinosaurs, and forward into time with pencil power! This "how-to-draw" assembly is an experience your children will never forget!
- At the conclusion of the drawing lesson, Mark invites the children with their parents' supervision to explore more fun drawing lessons on his website. Children can e-mail their drawings into the MarkKistler.com Genius Student Art Gallery.
- Your school may purchase additional drawing in 3-D video lessons for classroom follow-up instruction.
